EDUCATION

Northeastern University

Candidate for Bachelor of Science in Computer Science

GPA: 3.865/4.0

Relevant Courses: Object-Oriented Design, Algorithms and Data, Programming in C++, Foundations of Data Science, Fundamentals of Computer Science I & II, Fundamentals of Cybersecurity, Mathematics of Data Models

August 2023 – Expected: May 2027

Boston, MA

SKILLS

Languages: Java, Python, C++, JavaScript, HTML/CSS, DrRacket, SQL

Frameworks/Libraries: React, Node.js, Tailwind, JUnit, Vite

Tools/Technologies: IntelliJ IDEA, VS Code, Git, Github, Eclipse, RESTful APIs, Postman, MongoDB

EXPERIENCE

FPT IS | Software Developer Intern

June 2024 – September 2024

Ho Chi Minh City, Vietnam

- Develop React components of enterprise websites for HURC Website to enhance metro route interface design, improving user experience and reducing **schedule-related customer inquiries by 10%**
- Configured **40%** of Smart Bus public transit website data model in Directus CMS, while actively participating in daily standups to communicate progress and blockers effectively

Edventure Design | Software Developer Intern

June 2025 – August 2025

Remote

- Developed Vibe Learning, an AI-powered microlearning app integrated into Edventure's technology environment using React.js, Node.js, and OpenAI API to transform static content into interactive educational experiences
- Collaborated with instructional designers to prototype and iterate on user-centered solutions, implementing Bloom's Taxonomy-based learning structures through sprint planning, wireframing, and usability testing processes

Teaching Assistant | Northeastern University

December 2024 – Present

Boston, MA

- Facilitated learning for over 74 students in CY2550 by explaining foundational cybersecurity concepts, including network security, cryptography, and threat modeling
- Graded assignments and projects, providing constructive feedback to help students improve their coding proficiency and understanding of cybersecurity principles

PORTFOLIO

Vibe Learning - AI Microlearning Platform | MongoDB, OpenAI API

June 2025 – August 2025

- Developed an AI-powered microlearning platform that transforms static content (URLs, PDFs, YouTube videos) into interactive educational experiences with automated lesson generation and knowledge assessments
- Integrated OpenAI API for intelligent content processing and implemented Bloom's Taxonomy-based lesson structures for personalized learning pathways, enhancing educational engagement and user experience
- Built scalable web architecture using React and Node.js backend, incorporating automated quiz generation, interactive learning journals, and comprehensive progress tracking features for optimal user engagement

CozyCommerce - E-commerce Platform | React, MongoDB

June 2025 – August 2025

- Developed a comprehensive e-commerce platform with modern UI/UX, featuring responsive navigation, product catalog, and secure user authentication system, utilizing React and Tailwind CSS for optimal user engagement
- Built a robust backend API using Node.js and Express, implementing RESTful endpoints and integrating Stripe payment gateway with MongoDB for scalable data management

Synapse Hub - AI LMS Platform | Drizzle, Gemini API

December 2024 – March 2025

- Developed a comprehensive AI-driven LMS, leveraging React for dynamic UIs and Tailwind CSS for custom design elements, enhancing educational engagement and user experience
- Integrated Neon for scalable database management, and implemented Gemini for the automated generation of adaptive learning content, facilitating personalized educational pathways and efficient course management
